

Immunization Record Requirements for Huckleberry Patch Daycare at Grand Targhee Resort

Updated: June 2026

To support a healthy and safe environment for all children in our care, Huckleberry Patch Daycare is currently only enrolling children whose immunizations are up to date according to the vaccine requirements established by the Wyoming Department of Health.

As a childcare program operating within a resort community, we regularly serve children and families visiting from a variety of locations. Because of the increased potential for exposure to communicable illnesses associated with travel and seasonal visitation, maintaining current immunization records for all enrolled children is an important part of our health and safety practices.

At this time, we are not accepting any immunization waivers or exemptions for enrollment. This policy has been established to help reduce the risk of vaccine-preventable disease transmission and to provide the safest possible environment for the children in our care. Current immunization records must be submitted prior to enrollment and updated each season.

We appreciate the cooperation and understanding of our guests as we work together to maintain a healthy childcare environment for everyone.

The next page lists the required Wyoming Department of Health Immunizations. The CDC Childhood Immunization Schedule is copied as well. Please note that the CDC lists more vaccines in its schedule than what is in the required immunizations list.

Copies of your child's Immunization Records must be current and include your child's name and date of birth on the form. If using an online portal to find and send it, please make sure to send the printable PDF version of the records. Screenshots of the pages from a phone do not usually include all needed information on the same page.

If you have any questions on confirming requirements, please email us at
daycare@grandtarghee.com

Wyoming Department of Health Immunization Requirements.

Immunization Requirements
